"The ALTERNATE MOTORCYCLE OPERATOR SKILL TEST consists of seven exercises that evaluate your ability to perform basic vehicle control, riding judgment, and hazard-response skills. Throughout the entire test you will be scored on time and distance standards, as well as path and 'foot down' violations. The test may be terminated due to point accumulation, falling or dropping the motorcycle, disregard for instructions, committing an unsafe act or failure to understand or follow instructions. If at any time you feel an exercise is too difficult you may stop the test. However, you must complete the entire test to pass it."
