

NSA NAPLES COMMAND ENVIRONMENTAL POLICY STATEMENT

COMMITMENT TO THE ENVIRONMENT

As Commanding Officer, U. S. Naval Support Activity (NAVSUPACT), Naples, Italy, I am committed to sound management of all environmental programs throughout my command and recognize that responsible environmental management is one of our highest priorities. We are committed to protecting health and safety of our employees and protecting the environment. We also pledge to make environmental standards an integral part of our planning and decision-making processes.

COMPLIANCE

Our challenge is accomplishing our mission of supporting enhanced Fleet readiness with limited resources. It is critical to the current and future success of our mission in an environmentally responsible manner that we:

- Set and publicize policies and goals which meet and/or exceed U.S. DoD Environmental Final Governing Standards for Italy
- Establish and follow supportive procedures
- Make continuous improvements as situations and technologies change
- Establish and maintain a team approach

POLLUTION PREVENTION

NAVSUPACT Naples commits to preventing environmental impacts from our operations by minimizing pollutant releases, seeking to minimize and eliminate waste volume, using environmentally friendly materials, reducing wastes, and recycling wastes in environmentally safe ways whenever feasible. We will be an environmentally responsible neighbor and partner in the communities where we operate, acting promptly and responsibly to correct conditions that could endanger health, safety, or the environment.

CONTINUAL IMPROVEMENT

NAVSUPACT Naples will seek opportunities for continual improvement of our environmental performance. We will set goals, measure progress and communicate results. Achieving the highest quality environmental management system is only possible through the commitment of each and every member of NAVSUPACT Naples' community to our goals, and full participation in our program. Each of us is challenged to incorporate environmental management into our everyday lives and work ethic. Most importantly, it will be conveyed through our everyday actions and leadership.

D. J. FREDERICK
Captain, U.S. Navy
Commanding Officer
